Mr. Charlie Savaliya
Amitron Corporation
2001 Landmeier Road
Elk Grove Village, IL, 60007

Dear Mr. Savaliya:

Re: Qualified Manufacturers List (QML) Certification, MIL-PRF-31032; FSC: 5998; CAGE Code: 1LHP6; VQE-23-037955 / CN084721

A validation audit was performed September 13-15, 2022 of your facilities at 2001 Landmeier Road to the requirements of MIL-PRF-31032 and your Technical Review Board (TRB) approved Quality Management (QM) Plan.

Compliance with these requirements has been successfully demonstrated. Therefore, Amitron Corporation is considered a certified manufacturer eligible to qualify and supply printed boards to the requirements of MIL-PRF-31032. The effective date of this certification is July 7, 2023

This certification gives your TRB the responsibility and flexibility to approve major changes to the MIL-PRF-31032 certified process flow and QM plan with concurrent notification to the qualifying activity (DLA Land and Maritime-VQE), with the following exceptions:

- Test optimization initiatives must be coordinated with DLA Land and Maritime-VQE prior to implementation.
- Future qualification actions initially must be coordinated with DLA Land and Maritime-VQE throughout the qualification process.

This certification is valid from the effective date of certification and can only be terminated by written notification from this Center. For the duration of the certification, the manufacturer is subject to periodic reviews by the qualifying activity or its representatives. Amitron Corporation agrees to submit status reports in accordance with its TRB approved QM Plan and MIL-PRF-31032.

All qualification tests, lot conformance, and periodic conformance inspections must be performed at facilities which have DLA Land and Maritime-VQ Laboratory Suitability Status for each of the applicable test methods. Should you have any concerns regarding this letter, please contact Mr Samuel Wagers, DLA Land and Maritime-VQE, at 614-692-9567 or vqe.sw@dla.mil.

Note: The results of the DLA Land and Maritime-VQE validation held on September 13-15, 2022 were found by examining a sampling of the manufacturer's normal manufacturing, testing, and processing procedures. The acceptance of the corrective actions from the above referenced validation does not relieve the manufacturer of its contractual obligation to deliver printed boards that comply with all applicable requirements.

Sincerely,

for Robert M. Heber
Chief
Sourcing and Qualifications Division
